

ABSTRACT OF THE DISCLOSURE

A basketball shooting accuracy aid includes a loop member
5 including a top edge, a bottom edge and a peripheral wall extending
between the top and bottom edges. The peripheral wall has an inner
surface and an outer surface. The loop member has circular shape. An
inner diameter of the loop member is at least one inch less than an inner
diameter of a basketball rim. A bracket is attached to the loop member
10 and is positioned adjacent to the bottom edge for selectively securing the
loop member to the rim such that the loop member extends upwardly above
a plane of the rim.
